### Closed CCR's (Promoted to Production)

**CCR 1285 – (DE) OPT Groups & Sub Groups Discrepancy** - The Module for entering Groups and Subgroups for OPT does not allow users to modify or add groupings to it. An error "Oracle Error Unable to update record FRM 40509" is displayed. Problem corrected.

### CCR 361 – (RQ) Financial Statement Graph Modifications –

Report can be run not only by Fund Group, but by Fund, Program, Project or Task. Report was limited to FMC level of the org, and now can be run by any level of the org. The report is called 'MARS Financial Statement - Graph by Fund Group'

**CCR 1184 – (Both) MARS Maintenance page** – The MARS team developed and implemented the webpage, for the support teams only, to provide a repository for all systems related documentation.

**CCR 461 – (Both) CCR System Enhancements** – Implemented modifications to comply with the new configuration management procedures.

**CCR 1124 – (Both) Data Entry Snapshot creation Remaining Commitment/Encumbrance** – Footnotes added to all BO reports that have the capability to display preliminary snapshot data. The Data Entry changes were promoted last month.

## Proposed CCRs

### CCR1286 – (Both) Report Documentation/Access Improvements.

Create samples of the reports found within Data Entry and Reporting and Querying modules. Allow users to quickly view reports with sample data to see if format/information relevant without having to run the actual reports. Samples will be useful for new users, and for existing users who are searching for the most relevant report for a given situation. Samples could be located either within the modules or through a link to a repository on the MARS web site. Actual user email request is as follows: "Last year at the 2008 OAR Management Conference I was asked to champion an item for MARS Implementation: Sample Reports. It has been requested by OAR Administrative and Budgeting personnel to have snap shots of each report, within the MARS Report Query modular. The best choice would be to have these attached to each report but a collection of them, with their coexisting report title, located at a connection that could be accessed at the MARS website would be acceptable. Having the sample snap shots would make it more time efficient to see quickly if the report contained the relevant information that was needed. As of now all the query information needs to be entered and you have to wait until the report runs before you know if it will show the information you are needing. This can take a lot of time, going through multiple reports trying to find what is needed. The descriptions under the titles are not very clear either nor can they go into the detail of how the report is laid out. Please let me know if this is feasible, I will need to report on this in the 2009 OAR Management Conference that is coming up. I speak for all of us when I thank

you in advance for taking this request into serious consideration for implementing, and if possible before FY09 year-end closing would be most appreciated. "

**CCR604 – (DE) Budget Module / BOP interface** - Revisit and discuss creating method to download BOPs (other than BOPS designated as Target) into Budget Module to reduce double entry into both CBS and MARS. Actual methodology would need to be fleshed out. Some suggestions are that method would need to be optional, perhaps selecting BOP data from a list. User would need ability to potentially break BOP plan into multiple tasks, either by percentage or dollars.

**Outstanding Issue/Items for discussion**

**Question** - Now that the “Financial Statement Graph report / CCR 361” can be run to a further level of detail, the technical team would like to know if the report should be renamed.

**Best Practices**

None at this time.

**CCR Queue (Open)**

Open CCR’s should be reviewed when evaluating and prioritizing new CCR requests.
